

Technical data sheet

MPX® Titan

The MPX® TITAN textile dosing system is equipped with a powerful diaphragm pump. This diaphragm pump operates with minimal pulsations, even when dealing with viscous or dense media.

Its two outstanding features are:

- **Powerful performance:** Easily handles more than 200 tons of laundry per month.
- **Reliability:** Reliable 24/7 continuous operation, even under heavy use and harsh conditions.

Ideal for laundries with long washing lines and large machines.

Performance data	Max. delivery rate for washing chemicals:	1500 ml/min
	Max. delivery rate for rinsing:	3000 ml/min
	Number of washing machines:	Max. 7
	Number of chemical products:	Up to 13
Electrical data	Power consumption:	60 VA
	Operating voltage:	100 ... 230 V
	Frequency:	50 / 60 Hz
	Control input voltage:	12 ... 240 V AC/DC
Mechanical data	Protection class:	IP24
	Weight:	10.5 kg
	Dimensions W/H/D:	520 x 610 x 201 mm
	Hose connections Multiplexer:	8 mm inner diameter
	Medium with viscosity ≤ 100 mPas:	50 m hose length
	Medium with viscosity ≤ 300 mPas:	30 m hose length
	Medium with viscosity ≤ 800 mPas:	15 m hose length

Operating data

Fresh water connection:	DN20, 3/4"
Water supply pressure inlet:	1 ... 10 bar
Max. Permissible operating pressure:	1.5 bar (pressure side) *2
Water temperature:	4 ... 40 °C
Separation from potable water supply:	DIN EN 1717 cat. 5
Suction height:	1.7 m
Dosing programs:	80 dosing programs
Program steps:	426 program steps
Product dosings:	2304 product dosings
Ambient temperature range:	+10 ... +40 °C
Environmental stress:	DIN EN 60068-2-38

Operating modes:

Direct modes:	Direct modes: (1:1, sum, binary)
Program Detection:	APD-Modus (Automatic) MPD-Modus (Manual)

Configuration

Device:	Windows laptop (SSC software)
---------	-------------------------------

Ambient conditions

Ambient temperature range:	+10 ... +45 °C
Environmental stress:	Conforms to DIN EN 60068-2-38

Data storage

Detergent / dosing program request
Container empty events / container change
Error events: dosing error / no water

*2 2 If the maximum pressure is exceeded, the system automatically reduces the delivery rate. If the pressure does not decrease further, the system shuts down.
